DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 3/17/2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the spindle, as disclosed in claim 40, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. For the purposes of examination examiner is assuming that the claimed spindle is the threaded rod (F).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 3724

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 34, 36-38, 40, and 46-49 are rejected under 35 U.S.C. 102(e) as being anticipated by Tarpill et al (U.S Patent No. 6,581,291), hereinafter Tarpill.

Tarpill teaches (see Figures 3 and 5) a device capable of trimming windshield wiper blades having a basic body (10) with a longitudinal passage (14). A first guide (40, 42, 44) is located adjacent to the passage and is curved in a longitudinal direction of a material being cut (16). A cutting unit (20, 32, and 34) is adjustably mounted in the body (10) and comprises a cutting blade (20). The cutting blade (20) is positioned normally to a direction of movement of the material being cut (16) and normal to a cutting direction. A second guide (30) is located in proximity to the cutting blade and is capable of guiding a wiper blade. The second guide (30) tapers in a direction of

Art Unit: 3724

movement of the material being cut (16) from a large width to a fixed width. Figure 2 shows that the second guide (30) has a depth capable of covering a portion of a lip or a wiper blade to be cut. The second guide (30) expands into a discharge passage after the blade. Means are provided for adjusting the cutting unit with respect to the first guide. An adjusting wheel (52) is mounted in the recess of the body (10) and communicates in a play free manner with a spindle (32) to adjust the cutting unit. The position setting of the cutting unit is lockable by means of a set screw (62).

Response to Arguments

5. Applicant's arguments with respect to claim 34, 36-38, 40, and 46-49 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Freeland (U.S. Patent No. 5,848,471), Plana (U.S. Patent No. 4,693,004), Nguyen (U.S. Patent No. 5,044,081), Samuelsson (U.S. Patent No. 4,604,802), Faggioto (U.S. Publication No. 2001/0034919), Ducret (U.S. Patent No. 5,809,652), Danter et al (U.S. Patent No. 5,381,601), Matthews (U.S. Patent No. 2,013,893), Belling (U.S. Patent No. 6,611,571), Fabian (U.S. Patent No. 3,886,657), and Carney et al (U.S. Patent No. 5,285,577) teach elements of the current invention.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3724

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
